

NATIONAL GOAT HEALTH STATEMENT

Version 3.1, January 2016

Attached to accompanying NVD/Waybill

No. _____

SECTION 1 – CONSIGNMENT INFORMATION

Owner of goats: _____

Property/place where the journey commenced (full address): _____

_____ State: _____ Post Code: _____

Property Identification Code (PIC) of this property: _____

Number	Year born (month, if known)	Description (ie. Breed, sex and type)	Identification (eg. PIC/brand on ear tag if different to above)

Please attach a list if more information is required.

SECTION 2 – JOHNE’S DISEASE (JD)

1. This consignment has an assurance rating of: *(refer and complete overleaf)*

Section A _____ **Section B** _____
Consigning Herd Rating + **Risk Management Rating** = **TOTAL ASSURANCE RATING**

2. Were all these goats born on the above property? Yes No

If no, date introduced: _____
 Assurance rating of introduced goats at time of introduction: _____

3. Have goats with a lower assurance rating than the consigned goats been introduced into the herd in the last 2 years? Yes No

If yes, what was the lowest assurance rating of those introduced goats? _____

4. How many different sources of goats have been introduced to the consignor’s property in last 2 years?

None 1-5 6 + Bucks only

5. Are all these consignment goats from a GoatMAP flock? Yes No

Status: _____ Expiry date: _____

SECTION 3 – FOOTROT

6. Have the goats in this consignment been observed for, and any suspect goats examined for, signs of **FOOTROT** during the past 14 days? Yes No

7. To the best of your knowledge, are the goats in this consignment free from **VIRULENT FOOTROT**? Yes No

8. To the best of your knowledge, are all sheep and goats on the consignor’s property free from **VIRULENT FOOTROT**? Yes No

SECTION 4 – OTHER HEALTH INFORMATION

9. Is the herd **CAPRINE ARTHRITIS ENCEPHALITIS (CAE) ACCREDITED FREE**? Yes No

Flock Accreditation No. _____ Expiry Date: _____

10. The goats in this consignment are derived from a herd which has had a whole herd negative test for **CAE** within the last 90 days. Yes No

11. To the best of your knowledge, are the goats in this consignment free from **LICE**? Yes No

12. Treatments	Product	Date of last treatment
External Parasite Treatment		
Drench		
Vaccination other than JD (eg CLA)		
Other		

SECTION 5 – DECLARATION

As the owner and /or person responsible for the husbandry of the goats in this consignment, I declare that the information in this statement is true and correct.

Signed: _____ Date: _____

Name (print): _____

Contact phone: _____

Persons making false statements may be liable under fair trading and other relevant state legislation.

EXPLANATORY NOTES

SECTION A: Choose 1 Category in this section

Tick **only one** rating in this section and enter that rating at the bottom of Section A.

The herd from which the goats are consigned is:	Assurance Rating
In the GoatMAP with MN3 status	8 <input type="checkbox"/>
In the GoatMAP with MN2 status	7 <input type="checkbox"/>
In the GoatMAP with MN1 status	6 <input type="checkbox"/>
Not known infected and has no risk factors ⁽¹⁾	5 <input type="checkbox"/>
Not known infected, but has risk factors ⁽¹⁾	4 <input type="checkbox"/>
Restricted 2 status – RD2 ⁽²⁾	3 <input type="checkbox"/>
Restricted 1 status – RD1 ⁽³⁾	2 <input type="checkbox"/>
Infected but undertaking an approved Property Disease Management Plan ⁽⁴⁾	1 <input type="checkbox"/>
Infected or suspected of being infected ⁽⁵⁾	0 <input type="checkbox"/>
CONSIGNING HERD RATING SECTION A:	

SECTION B: Choose 1 Category in this section

Tick the number where applicable and add them at the bottom of Section B

The following management factors reduce the risk of Johne's disease in this herd:

The herd is not in the GoatMAP, but has had a Check Test ⁽⁶⁾ with negative results in the past 12 months	1 <input type="checkbox"/>
The consignment of goats are Approved Vaccinated Goats ⁽⁷⁾	1 <input type="checkbox"/>
The consignment of goats has been reared under a nationally approved and independently audited kid rearing plan ⁽⁸⁾	1 <input type="checkbox"/>
RISK MANAGEMENT RATING FOR SECTION B:	

TOTAL ASSURANCE RATING = A + B = _____

1. Risk Factors:

- (a) The herd contains goats that were born or raised with dairy goats. The herd contains dairy breeds or dairy cross breed goats. *Exceptions are* goats that are from Goat MAP herds, or goats born and raised in WA.
- (b) The herd has grazed land in the past 5 years that is at risk of JD contamination. Land at risk of JD contamination includes land that is being grazed, or has been grazed in the preceding 12 months, by:
- Dairy breeds or dairy cross bred goats, which are not sourced from GoatMAP herds.
 - Goat herds with RD2 or lower status.
 - Dairy cattle with a Dairy Assurance Score of less than 7.
 - Beef cattle, other than those in the CattleMAP or Beef Only.
 - Sheep other than SheepMAP flocks from areas without an audited Regional Biosecurity Plan which includes ovine Johne's disease.

2. RD2: A herd which has had a second negative herd test of all animals over 12 months of age in the herd, at least 2 years after RD1 status was achieved. This is part of an Approved Property Disease Management Plan.

3. RD1: A herd with a history of infection which has had 1 negative herd test of all animals over 12 months of age in the herd, at least 12 months after the last infected animal was removed from the herd. This is part of an approved Property Disease Management Plan.

4. Infected but undertaking an approved Property Disease Management Plan: An infected herd that has not yet progressed to RD1 status but is complying with an on-farm disease control program combining elements of testing, kid rearing and biosecurity that has been approved by Chief Veterinary Officer (CVO) of the jurisdiction.

5. Infected or suspected of being infected: Means infected or suspected of being infected with Johne's disease. Herds are no longer regarded as infected or suspected of being infected when a Property Disease Management Plan, which has been approved by the Chief Veterinary Officer (CVO) of the jurisdiction, has been completed.

6. Check Test: A test of 50 goats over 12 months of age in the herd (or all goats over 12 months of age in smaller herds) by serology or faecal culture or pooled faecal culture of 2 pools each of 25 goats, with negative results. The animals should be selected so as to increase the probability of detecting infection, i.e. older animals, animals in poor body condition.

7. Approved Vaccinated Goat: A goat that is:

- Vaccinated with an approved Johne's disease vaccine by 16 weeks of age; or
- Vaccinated with an approved Johne's disease vaccine after 16 weeks, when the flock
 - was in the GoatMAP, or
 - had undertaken a negative Sample Test by PFC in the 2 years preceding the vaccination; or
- Is identified as an Approved Vaccinate in accordance with State legislation.

8. Nationally approved kid rearing plan: A kid rearing plan designed to minimise the spread of Johne's disease in intensively managed herds, which has been documented and agreed by GICA and Animal Health Committee.
